(a) Source and adopted representation
True stress (MPa)
Total true strain (dimensionless)
Figure-based input
follows the published curve
Adopted input: total strain restored
Digitised Zhao Figure 11
Equation as printed (not used)
(b) Adopted hardening input
$E = 208$ GPa; $\nu = 0.3$
Plastic strain (dimensionless)
Adopted deck hardening table
Added constant-stress tail
Imposed yield anchor
(c) Near-yield detail
First recovered point
430.8 MPa
365 MPa anchor
(imposed)
(d) Terminal extension
Recovered end
0.7910574
Criterion
0.8
Added tail
